

RADIO BUILDS HEALTH & WELLNESS BRANDS

- **radioGAUGE** Research is conducted by an award-winning third-party UK research company DRG using an established test and control methodology.
- 80,000+ radioGAUGE respondents have consistently demonstrated that the inclusion of radio in media campaigns improves results across all key metrics.
- **RadioGAUGE results confirm that including radio in a campaign increase both brand salience and purchase consideration.**

**Index
154**

Brand Awareness- *Brand recall indicates the effectiveness of the campaign in building brand salience.*

Canadian adults exposed to **HEALTH & WELLNESS** advertising on **RADIO** were **54%** more likely to mention the brand unprompted, than those not exposed to radio in the campaign.

**Index
130**

Campaign Awareness- *important for capturing radio's ability to reach large audiences and drive awareness.*

Respondents exposed to radio in the **HEALTH & WELLNESS** campaigns tested were **30%** more likely to recall advertising for the brand on any medium; indicating that exposure to radio ads sensitizes consumers to brand activity across other media.
